

Timing Light with Advance Feature

The timing light enables the synchronization of the ignition system with the piston movement. An inductive pick-up replaces the necessity to disconnect the spark plug lead to operate the timing light. Timing readout: 0-60° BTDC Features: Timing advance up to 60 crankshaft degrees | Superior performance at all speeds through 8000 rpm | Operates on all 12volt ignition systems | Xenon bulb providing brilliant blue/white | 1,000,000 flash capacity | Automotive reverse polarity and overload protection | Inductive pick-up | Double-check light that indicates incorrect hook-up and faulty flash | Replaceable Xenon flash tube (Part No. 77009) | Full instructions included.

Additional Information

- Operates on all 12 volt ignition systems.
- Xenon bulb providing brilliant blue/white light (Replacement available, Part No. 77009).
- 1,000,000 flash capacity.
- Automotive reverse polarity and overload protection.
- Timing advance up to 60 crankshaft degrees.
