

Trakrite Magnetic Camber Castor & King Pin Gauge

A 3-in-1 magnetic gauge that attaches to the hub or disc brake for accurate measurement of castor, camber and king pin inclination. Precision tool for optimising vehicle handling and performance. A heavy duty gauge designed for the professional workshop. There are a pair of knurled, metal adjustment knobs on the back to set up KPI and castor angle and a spirit level on the front for setting up the tool. Used on its own for accurate camber readings or with a pair of turntables to check kingpin inclination and castor alignment. Supplied with clear instructions and a fitted sturdy case for portable safe storage.

Additional Information

- Strong magnetic base for secure fixing on hub or brake disc.
- Measures camber, castor and kingpin inclination.
- Camber gauge with fixed graduation from -5° to $+5^{\circ}$; caster gauge graduated from -3° to $+11^{\circ}$; kingpin gauge from 0° to $+14^{\circ}$, left to right.
- Use with turntables (Gunson Part No. 77158) and rear wheel level plates for king pin and castor measurements.
- Supplied in a fitted blow mould storage case (250 x 220 x 100mm). For easy attachment to alloy wheels use Trackrite Camber Bar, Part No. 77137.
