

Sand Blaster Gun

Compact sand blast gun for use with a workshop compressed air supply (recommended operating pressure 90psi) for quickly and effectively removing rust, old paint, carbon deposits etc. It features a 600cc blast media container together with a fully adjustable control valve to manage the flow of blasting media through the gun, which also has the ability to completely restrict the flow of media allowing for air only. Ideal for cleaning pitted surfaces, crevices and other hard to reach places, the gun is designed for performance and ease of use.

Additional Information

- Gravity-fed sand blasting gun ideal for removing paint, rust & carbon residue from inaccessible locations including corners and joints.
- Plastic ABS body. 600cc (18oz) blast media container.
- Nozzle size: 5.0mm ID, manufactured from steel. Ideal for precision applications.
- Air inlet: 1/4" female; operating pressure 90psi; air consumption 7 SCFM.
- Reusable shot-blasting media available separately, please see Part No. 77156.
