

Wet & Dry Vibratory Tumbler Polisher

Similar to Gunson 77172 but larger, capable of taking components up to 250mm long, and fitted with a drain to allow the use of wet media. Wet tumbling, or wet processing, is used for more aggressive cleaning, faster deburring and polishing of metal parts, particularly when dealing with oil, dirt or oxidation.

Additional Information

- Ideal for performing dry shining, metal polishing & rust cutting on objects up to 250mm (10") long.
- Rugged polyethylene tumbler bowl with securely sealed lid. Capacity 18lb (8.1kg).
- Fitted with 40w motor 220v/50Hz & 3 pin standard UK mains plug.
- Overall dimensions: 381mm diameter x 464mm high.
- CE, UKCA & RoHS compliant. 1kg media bags available separately: brown resin for de-burring & rust removal (Part No. 77160) & ceramic for polishing (Part No. 77161).
