

Timestrobe Xenon Timing Light

The Xenon timing light allows the dynamic ignition timing to be set. Includes inductive pick-up for simple connection. Capable of delivering up to 5000 flashes per minute. Suitable for any petrol engine vehicle with 12v ignition system including electronic types where applicable though some ignition systems are not externally adjustable. Indicates ignition timing and allows adjustment to manufacturer's specification. The inductive pickup clips directly on the ignition HT lead and is powered by the vehicles own 12v battery. The special Xenon bulb provides the ultrabrite flash needed to see engine timing marks, even under normal daylight or bright workshop conditions. • Operates on all twelve volt ignition systems • Xenon bulb providing Brilliant Blue/White • 1,000,000 flash capacity • Automotive reverse polarity and overload protection • Inductive pick-up • Replaceable Xenon flash tube available, please see Part No. 77009.

Additional Information

- Suitable for any petrol engine vehicle with 12v ignition systems.
- Also suitable for some electronic types. Max. RPM (4 stroke) 9999 RPM, Max. RPM (2 stroke) 5000 RPM. NOTE: 4 stroke wasted spark ignition systems = Max 5000 RPM.
- The Xenon timing light allows the dynamic ignition timing to be set.
- Includes inductive pick-up for simple connection.
- The special Xenon bulb provides the ultrabrite flash needed to see engine timing marks under normal daylight or bright workshop conditions.
